

Handy 100V Power Supply

The model MP-100, Handy Power Supply is a cost competitive, compact and light-weight unit. Easy to operate, either 50 or 100 V is selectable as the output voltages are its features. These voltages are sufficient for ordinary electrophoresis of DNA and RNA.

Features

- Compact size
- Power capacity: 100V, 40W
- Two constant voltages: 50V, 100V
- No load detection
- Shrouded plugs and sockets
- Sufficient capability for horizontal electrophoresis systems
- Great value at very competitive pricing
- Bundled package with MJ-105-S, MJ-105-R, and MT-108

Specification

- Max voltage: 100V
- Max Watt: 40W
- Output type: Constant voltage
- Voltage selection: 50V and 100V
- Safety device: No load detection; shrouded plugs and sockets
- Operating temperature: Ambient to 40°C
- Unit dimension: W60 x L40 x H120 mm
- Terminator pairs: One pair
- Construction material: Polycarbonate (PC)
- Weight: 0.3 kg
- Rated voltages: 100-120V only
- Compact size
- Bundled with electrophoresis cell, MJ-105-S/R or MT-108
