

## Smart Minis 300V Power Supply

### Product Description

In comparison to Minis 150V power supply series, major science Smart Minis 300V power supply (Cat. No. Minis 300VS) is equipped with even higher voltage, up to 300 Voltage, sufficient for SDS-PAGE, and native PAGE applications. Similarly, the powerful specifications ensure two pairs of terminator can be used simultaneously even though Minis 300V power supply is in the same size of Minis 150V power supply. Minis Power Supply is designed for individuals to have his/her own power supply unit plus the packages with either larger Horizontal Electrophoresis system or Vertical Electrophoresis system in laboratories to efficiently handle multiple electrophoresis gel tanks reducing interrupting others' experiments and time waiting for the instrument. Minis power supply only uses small lab bench space at very reasonable price. Like Minis 150V power supply, Minis 300V power supply series also has two different colors of front label to customers.
